Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 55 and 57 are rejected under 35 U.S.C. 102(e) as being anticipated by Fermann et al (5,818,630).

Regarding claim 55, Fermann discloses a method of generating ultra short optical pulse comprising, circulating light energy within a laser cavity (See Figure 1)

amplifying said light energy within said laser cavity in a bent multimode fiber Figure 1, Character 12, (abstract, Column 4, lines 33 – 45, and confining said light energy within said laser cavity substantially to the fundamental mode of said multimode fiber (Figure 1, Character 12) .

Regarding claim 57, Fermann discloses a mode filter (see Figure 7, Character 70, Column 4, Lines 66 – 67, Column 5, Lines 1 – 2 and Column 11, Lines 40 – 50).

Allowable Subject Matter

Claim 56 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
